Background

Next U is the executive education arm of NTUC LearningHub – Singapore’s largest continuing education provider. Next U represents the Labour Movement’s commitment towards getting Singapore’s Professionals, Managers and Executives “Future-Ready”. With almost 500 cutting-edge courses spanning infocomm & technology, productivity & innovation, service excellence, leadership & management and professional certifications from over 20 best-in-class global and local education partners, including UC Berkeley Extension, the Disney Institute and world-renowned technology brands, we help businesses and professionals realize their full potential through high-value professional developments and consulting solutions designed to take them to the next level.

Cloud Training Courses

Next U possesses deep technology-based training development capability in strategic areas of IT: Business Analytics; Social Media Analytics and Web Intelligence; Business Processes and Systems; Software Systems; and Information Security & Data Privacy.

Cloud Computing and Virtualization is a core area of Next U’s ICT training offerings. Covering the technical, management and governance aspects of Cloud technology for public and private sector organisations across various markets and industries. Next U’s Cloud courses are run in collaboration with leading partners like the Singapore Management University’s School of Information Systems (SMU-SIS) and the University of California Berkeley Extension (for overseas specialized courses under IDA’s iLEAD program). These Cloud courses are aimed at providing students with a solid understanding of the technology fundamentals, architecture & design, deployment and economics of this rapidly-growing and evolving field.

Students will benefit from the world-class instruction of faculty from these prestigious institutions for their respective courses, as well as receive certificates awarded by SMU-SIS (for local courses) or a Professional Award from UC Berkeley Extension for completion of the full professional series (for courses taken overseas in Berkeley, USA, under iLEAD).
