Background

Republic Polytechnic (RP) strives to be a learning space not just for our students but also for working adults. The Centre for Professional Development plays support to RP's Continuing Education and Training, which offers various specialised skills and executive courses for aspiring professionals who wish to enhance their career or are keen on personal growth.

Cloud Training Courses

RP offers a 2-day course on **Introduction to Virtualisation and Cloud Computing**. The course will introduce the concept of Virtualisation and how it can be used to maximise computing asset utilisation such as desktop/laptop and servers in both operational and development environments. The hands-on approach course will also introduce the various models of Cloud Computing. Case studies of running web-based applications, using a type of Cloud Computing service called IaaS (Infrastructure as a Service), are used to examine issues such as scalability. You will learn how to use various Open Source tools and technologies during the hands-on sessions.

At the end of the course, you will gain an understanding of the various virtualisation technologies and cloud computing models, as well as the technical skills. This course will be conducted by experienced trainers from RP School of Infocomm.

About Republic Polytechnic's School of Infocomm

RP School of Infocomm (SOI) prepares students for the challenges in the Information Technology (IT) industry. SOI partners various industry leaders to provide laboratories that are equipped with the latest technology to enrich students' learning experiences. The School has been aggressively employing virtualisation and cloud solution to support teaching needs. Cloud Computing has also been incorporated into our comprehensive curriculum.
